Official Composing Tourney

Judges: Hans Peter Rehm, Thomas Maeder

Theme: Official Composing Tourney asks for h#, s#, r#, or direct mates in 2 moves.

White line piece (pawn) is interfered with on square X. In other variant, solution, twin, or phase, black line piece (pawn) is interfered with on the same square X. Zeropositions are allowed. Fairy pieces are allowed, fairy conditions are not.

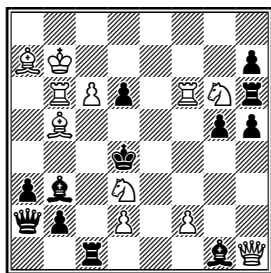

We received 31 entries, which we grouped into two sections: 18 problems with help play and 13 with direct play (including selfmates).

Unfortunately, some of the most interesting problems turned out to be anticipated, incidentally by problems by former and current PCCC members (Avner, Fougiaxis, Simoni). Among the help problems, we also had to exclude a number of non-thematical entries.

The black Grimshaw in the try becomes a noble Novotny with changed mates in the actual play, with the particular feature that the two threatened mates exploit the double interception, but the thematical captures lead to different mates. Good sacrificial key; the construction may not be optimal.

The transformation of Novotny to self-pin with changed mates is familiar, but the "Dombrovskis effects" add interest. From a solver's point of view, the try intercepting Rc1 is not convincing.

1st commendation

Yosi Retter (Israel)

Another ODT with "Pseudo-le Grand". For this content, the construction is rather heavy.

2nd commendation

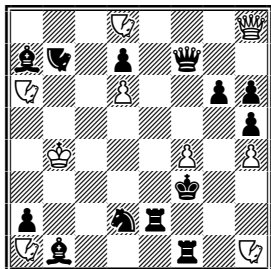

Yosi Retter (Israel)

Novotny on one square leads to Grimshaw defenses on another and vice versa. This combination has been shown many times, but the construction is good and we couldn't find a direct anticipation.

Reciprocal interferences of a white and a black line piece has been shown many times, but we didn't find any example where the interference of the white piece unpins a black piece which has to pin itself again. Perfect construction.

The same cycle of interceptions as in the prize, but capturing the black intercepting piece does not result in pin mates, of course. On the other hand, 31 has nice mates and a very light setting.

More reciprocal interferences in good construction, this time with mating moves to the same square, realised using an unpopular twinning mechanism.

The black rooks are once intercepted by a white bishop and once by the black queen which pins itself.

Champagne Tourney 2008 for Retros

Judge: Michel Caillaud

I accepted collaborations between 1 attendee and helping non present composer.

Section A - Proofgames

16 entries by 13 composers in this section. 3 problems were cooked.

It was possible to show the theme :

-with static play of the pinned piece : pinning piece and opposite King making all the work so that the pin is not exploited; just there for the picture.

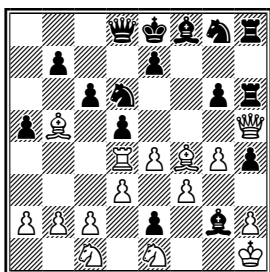

-with shielding : a piece is interposed to allow the King to reach some square; the theme here is shielding rather than pinning that is a mechanical consequence of it.

These were considered as inferior presentations of the theme.

I gave greater importance to the strategical use of the thematical pins, so that the spectator sees the theme rather than is looking for it.

Considering the preceding considerations, a clear winner. The spectator cannot miss that the main idea of the problem is pinning with echo strategy on two lines : Rook unpins a Pawn, then is unpinned by a Knight which in turn is unpinned by a Pawn.

A record presentation of 6 different pin-lines for the thematical Pf7 cannot be ignored by the judge. The first pin shows some strategic play with unpinning; the following are of the shielding type, accompanying

black king in its walk, some of them being hardly exploited (f3-f5-f7 is of little use as King has to escape g4-f5-e6 before fxe4 is played).

Not a record nor intensive pinning strategy but a very enjoyable game with black circuiting Knight shielding its King in 3 directions. Among shielding presentations, the ones where the shielding piece performs switchback thus underlining the strategy are preferable.

I boldly said in announcement that I would allow "large interpretation" of pinning notion. Spike is a kind of pin in Isardam. It is possible to spike a piece along different lines simultaneously and this problem exploits this fact with black King as the spiked piece! A good joke with "double-spike mate" at the end.

A bold idea. Bishop f1 was pinned in the retro-play as a Pawn and is pinned in the forward play. Weak points are the use of 2 different white bishops (one for retro, one for forward) and the non-strategical use of the pins (they are just there, and a spectator not knowing the theme will hardly detect the idea).

6th Romanian Tzuica Tourney

Judges: Vlaicu Crisan & Eric Huber

Theme : Helpselfmates (hs#n) or helpselfstalemate (hs=n) with Orthogonal/Diagonal Transformation. All fairy conditions and pieces are allowed.

21 problems by 16 composers from 11 countries have taken part in this tourney. We had expected more entries, taking into account the accessibility of the theme; however, getting less entries gives less trouble to the judges and they are grateful for that.

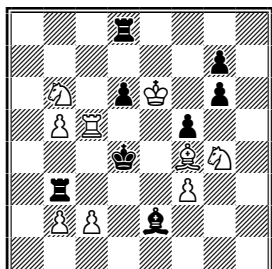

We appreciated the ways the ODT was achieved. We accorded priority to compositions where the number of moves showing orthogonal/diagonal transference were higher. This is why some very good (er, French) problems were excluded from the award: we think they'll have a better chance in tourneys where there is no particular ODT thematic requirement.

A series of problems showed rather discreet interpretation of ODT, either for only one colour or for final positions. Even if we enjoyed them, they were no match for the more intensive ODTs shown in the problems retained in the award.

The order of the final classification was determined by the following criteria: how striking the ODT effects appear in the solutions, the matching strategy and the economy of white/black forces. We thank all the composers for their participation in this tourney and we warmly congratulate the winners.

Pin mates achieved in a flawless setting. The black Rook and Bishop exchange functions, as well as the white Rook and Bishop. The initial position is already ODT pregnant. A true masterpiece from the distinguished Czech composer.

(A matter of taste: we would have replaced wPb5 by a wPb4, with the idea that it's better to save white material.)

2nd Prize

Kostas Prentos (Greece)

Reciprocal black batteries obtained in a very economical setting. In each solution the white piece shielding the wK is captured by its black counterpart, creating a battery. The black battery is activated by wQ checks. Mates are model and are achieved by simple (not double) check. An amazing achievement by the Greek composer for his first helpselfmate problem!

3rd Prize

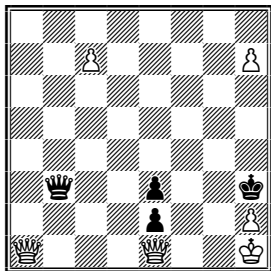

Ricardo De Mattos Vieira (Brazil)

The striking mechanism of a double-spiked Queen has already been used by the same author in another problem that is currently competing in a formal tourney we are also judging. This mechanism is probably better adapted to help play. The bQ's spike-Pelle moves are very elegant and the switchback is highly in the spirit of the theme.

From a constructional point of view, wPa6 and bRh3 are merely cookstoppers.

This very ambitious problem is perhaps the first rendering of a helpselfmate of the future (HSOTF) and would surely gain top honours in any informal tourney.

The only slight blemish we could find is the useless wB (resp.wR), each in one solution of the second pair.

This problem misses a prize (and the subsequent corresponding bottle!) by an inch. In each solution Black creates two antibatteries, one direct and one indirect, with the help of the bS. But, alas, the solutions are slightly unmatched: Rh4 selfblocks in the second solution while in the first Bb4 does not block; bS is guarded by bK in the first solution and by bP in the second one.

2nd HM

Frantisek Sabol

This problem reminded us vaguely of the 1st Commendation of the 1st section, Tzuica Tourney Eretria 2005, by the same author using the same white sacrifices. (By the way, that problem would have been more successful here. Sorry, Frantisek.) The dual avoidance claimed by the author is not pure: 1.Re6? fails because of the interference 2.Bb3 while 1.Qd8? fails for another reason, i.e. occupation of a rebirth square.

The ODT is not 100% perfect: 1.Qg8 should have been a diagonal move.

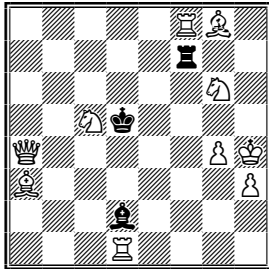

3rd HM

Mark Erenburg

Clear and convincing presentation of the theme. The spectacular wQ ambushes at W1 are justified only at last in the mating position. Again this beautiful problem would have deserved a prize, had it not been for the useless Grasshopper in each solution.

1st Commendation

Michal Dragoun (Czech Republic)

We could not help putting one of Michal's problem as the first Commendation, after the 1st Prize and the 1st HM. As usual, Michal created an intensive rendering of the theme. But this time we discovered a serious drawback: wRf8 is useless in the first solution. Besides, the last white move is not homogeneous. Anyway, one can't win a bottle for every submitted problem.

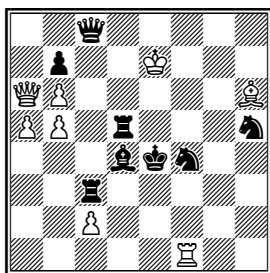

2nd Commendation

Juraj Lörinc (Slovakia)

We liked the presentation of the Vogtländer condition in connection with hs#. This miniature is not the first association of the stipulation with this condition. It would have been ranked higher if there had been more ODT effects for White.

Four (2-2) solutions with very good interplay and harmonic black and white play without twins. Four different active black sacrifices. A very good and complex presentation of the theme by means of a pair of pins of the bSf4 and a pair of interferences by the same bS on the bTc5 and bDc8 lines, which are the black pieces sacrificed in the other two solutions.

2nd Prize
Thomas Maeder, Hans Peter Rehm, Kjell Widlert

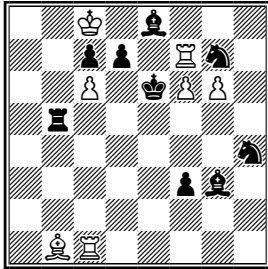

A very good interplay: bicolor active sacrifices to explore the black half-pin, resulting in black self interferences. Zilahi and inversion of white moves. The theme is shown in a perfect way by bTc7/bPd6 on c5 and bDc4/bPd7 on c6

Another cyclic presentation of the theme, and also cyclic active sacrifices of black thematic pieces and cyclic interferences. The White play is not as good and there is a small unbalance in the capture of the bT because it does not occur in the mating move.

2nd HM

Menachen Witztum

A very nice black play, combining half-pin, line closing and blocking.

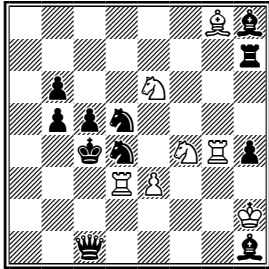

3rd HM

Michel Dragonn

In (c) and (d), two black thematic pieces (bD and bT) are prevented (capture / pinning) from playing on the thematic square (d3). Unfortunately the capture is also necessary for the white capturing piece to guard squares and a black pawn can substitute for the black captured piece (analyzing just the solution). Still a beautiful and complex helpmate, but with a poor white play.

Two thematic pieces and one thematic square in a presentation not totally harmonic because of the wK move.

3rd Commended

A single bS is responsible for the black show, with pinnings and blockings to present the theme. Some unbalance in the wK move and in the motivations for the bS not to play 1.Se4 in (c) and 1.Se2 in (d).

8th Japanese Sake Tourney

Judge: Tadashi Wakashima

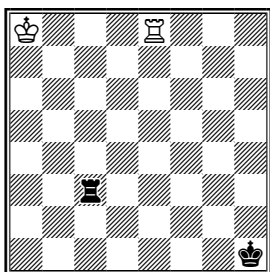

Theme: Fairy Helpmate#n ($n \leq 4$). Exact Echo. Zeroposition is not allowed.

The Japanese Sake Tourney this year is dedicated to the memory of Masazumi Hanazawa (1944-2007), who was one of the pioneering composers in Japan.

There were 23 entries. Most of them were usual echoes, which didn't get high rankings. What we seek for is much more unusual or spectacular effects.

The whole point of this problem lies in the final positions with Take-and-Make specific fairy mates. Take the first solution for example, 4.Kxb1->a3?? or Kxb1->d2??

If four solutions had ended in four corners, this would have surely shared 1st Prize and made a nice pair.

Theme:

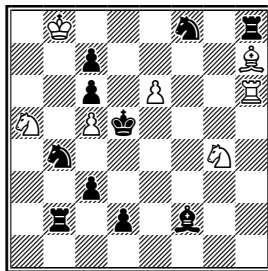

On the last (mating) move a white piece (pawns included) interferes with a white line.

I received 29 anonymous problems from the director **Paz Einat**. The theme allowed for the possibility that white piece will participate in one phase but not in the other (and vice versa for another white piece). This is contrary to the current (and maybe conservative) conventional concept in this genre. I hope that the presence of such problems in the award will make such compositions more generally acceptable. I found the overall level to be high and I enjoyed the different ways in which composers interpreted the theme.

28 entries were submitted of a quite satisfactory quality level. A few remarks for some problems that are not included in the award: D. Müller (Kf8/Ka7) is anticipated by PDB P0554310 and the accompanying direct unpins in the B1 moves are not justified (i.e. black Qa3 can be removed and Rf1 moved to a1), in D. Müller (Kh3/Ke4) and A. & V. Semenenko (Kg1/Ke4) the thematic unpins in the W1 moves are not utilised in the course of the solutions, U. Avner (Ke8/Kd4) is anticipated by O. Transformation of the set pin along the line c6-e5-g4 to a battery yields a super-AUW with five black pieces playing to the same square as additional formal element. A superb piece of work.

2nd Prize

Menachem Witztum (Israel)

The unpinned black pieces unpin the white queen or stay pinned in their initial position. I particularly liked the black queen hideaways and the dual avoidance, even if there is a certain feeling of imbalance (1.Qf3 closes a black line, whereas 1.Qf6 closes a white line).

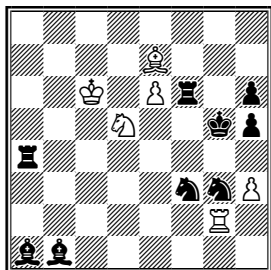

3rd Prize

The theme is done in 3 variations, including 2 in black corrections.

The main merit of this problem is that the author was able to double the motives of defense and weakening in the main variation, i.e., the black defense opens a line for another piece and unpins it, while at the same time open line for a white piece and unpins it.

Arves Study Tourney 2008

Judges: Marcel Van Herck and Luc Palmans

The Dutch-Flemish Association Alexander Rueb Vereniging voor EindspelStudies organised for the first time at the PCCC-Congress a study tourney. There were 10 entries from 8 composers. The level of the studies was very satisfying. But after checking with Harold van der Heijden's database and chess engines, unfortunately the judges had to eliminate several compositions because of anticipation or incorrectness. The judges will gladly provide the composers more details. There is one prize and one honourable mention.
